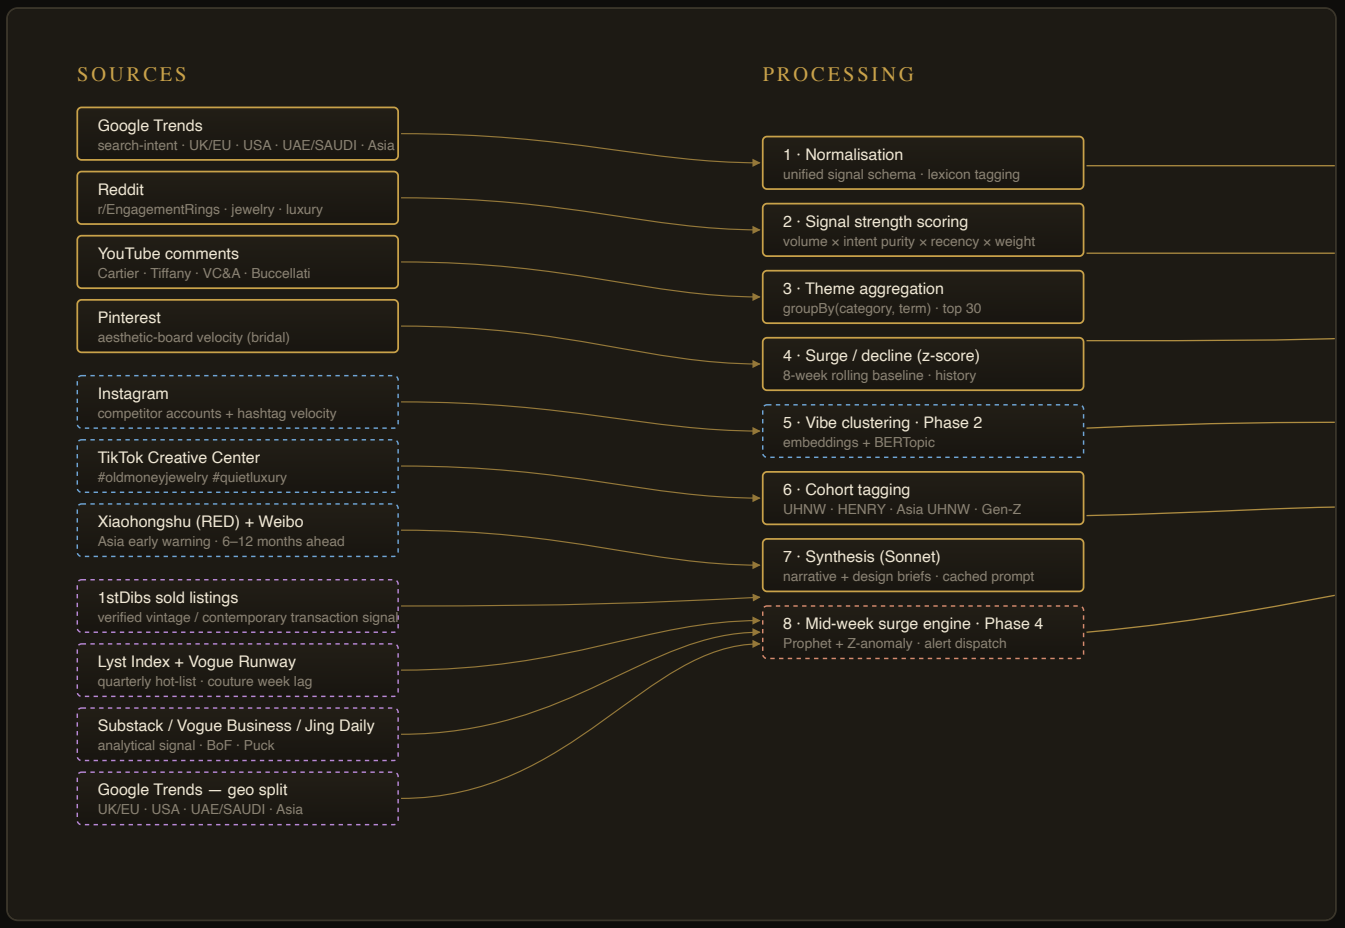
Faberge · TrendWatch

SYSTEM OVERVIEW · ARCHITECTURE · PHASES · PROCESSING LOGIC

Internal — AAS engineering view. Prepared 2026-04-27.

- All phases
- Phase 1 — MVP (4 sources)
- Phase 2 — Aesthetic + Asia
- Phase 3 — Sales + Dashboard
- Phase 4 — Alerts

ARCHITECTURE



PHASES — TIMELINE AND PRICING

WEEK 1 · NOW

Phase 1 — MVP

- 4 sources: Google Trends · Reddit · YouTube · Pinterest
- Scoring + cohort tagging + Sonnet synthesis
- First PDF bulletin + email draft for calibration

WEEK 2

Phase 2 — Aesthetic + Asia

- +Instagram · TikTok · Xiaohongshu
- Embedding + BERTopic vibe clustering
- Asia early-warning layer

£6,000 one-off

£6,000 one-off

WEEK 3

Phase 3 — Sales + Dashboard

- +1stDibs · Lyst · Vogue Runway · Substack
- Dedicated design-brief layer
- Live dashboard with historical trend view

£6,000 one-off

WEEK 4

Phase 4 — Alerts

- Mid-week surge detection (Prophet + Z-score)
- Telegram alert at Z > 3
- A/B-tested report delivery format

£3,500 one-off

SIGNAL SOURCES · 12 TOTAL, 3 TIERS

TIER 1 — HIGH INTENT (WHAT BUYERS ACTUALLY SEARCH AND PURCHASE)

Google Trends P1
search intent · UK/EU · USA · UAE/SAUDI · Asia

Reddit P1
PRAW · r/jewelry · r/EngagementRings · r/LuxuryFashion

YouTube comments P1
comments on Cartier / Tiffany / VC&A / Buccellati / Faberge videos

1stDibs sold listings P3
verified vintage + contemporary luxury transactions

TIER 2 — AESTHETIC / DESIGN (WHAT STYLE DIRECTION IS FORMING)

Instagram P2
Apify scrape · competitor accounts + hashtag velocity

TikTok Creative Center P2
#jewelrytok · #oldmoneyjewelry · #quietluxury

Pinterest P1
bridal aesthetic board velocity, not brand mentions

TIER 3 — GLOBAL / EARLY SIGNAL

Xiaohongshu (RED) + Weibo P2
Asia often leads Western cycles by 6–12 months

Lyst Index + Vogue Runway P3
quarterly hot-list · couture week to retail lag

Substack · BoF · Vogue Business · Jing Daily P3

analytical signal layer · Exa neural + Firecrawl

Google Trends — geo split P3

UK/EU · USA · UAE/SAUDI · Asia — relative momentum

PROCESSING LOGIC · 8 STEPS

1 Collect (parallel)

ThreadPool over N sources → `RawCollection` per source. Raw JSON stored in `data/raw/<week>/`.

2 Normalise + lexicon tag

Unified `Signal` schema. Tag by category (product · style · stones · cuts · metals).

3 Score

`strength = vol_norm × (0.4 + 0.6·intent) × recency × source_weight`.

4 Aggregate themes

`(category, term)` aggregate with strength + count + sources + regions + examples.

5 Z-score vs history

26-week rolling baseline. Trend labels: surge · rising · stable · fading · collapse.

6 Cohort tag

Cohort signal matching with weighted winner selection (UHNW/HENRY/Asia UHNW/Gen-Z).

7 Synthesis (Sonnet)

Cached prompt + strict JSON schema (headline · scorecard · briefs · triggers · risks).

8 Render + draft

Jinja → HTML → Playwright → PDF + draft email for final human review.

WHY THIS OUTPERFORMS CURRENT PILOT STACK

DIMENSION	MELTWATER / BRANDWATCH / SPROUT	FABERGE TRENDWATCH
Primary measurement	Brand mentions, share of voice, PR-wave sentiment	**Buyer intent** across search, discourse, aesthetics, and realised sales
Asia coverage	Limited, Western bias	Xiaohongshu + Weibo + Jing Daily with 6–12 month early-signal edge
Aesthetic intelligence	tag cloud / sentiment	embedding-based vibe micro-shift clustering
Design usability	dashboard output	**Action-ready design briefs** (segment, price band, timing)
Operating cost	£4,000–£8,000 / month stacked tools	£1,000–£1,400 / month including AAS support and upgrades

DIMENSION	MELTWATER / BRANDWATCH / SPROUT	FABERGE TRENDWATCH
Evolution path	vendor roadmap constrained	upgrades with stronger models + new sources without contract reset
